Short description

Spin a wheel or shuffle your choices. Make everyday decisions offline.

Full description

Too many choices? Give chance a turn.

PickForMe helps you choose what to eat, which movie to watch, what to play, where to go, or who goes first. Add your options, spin the colorful wheel or shuffle a list, and let a little randomness move your day forward.

TWO WAYS TO PICK
• Spin wheel: watch a smooth animated wheel land on your result.
• Shuffle list: see your choices shuffle before the final selection appears.

YOUR CHOICES, READY WHEN YOU ARE
Create a title, add your options, and drag to reorder them. Save lists for later, edit them whenever plans change, or duplicate a favorite list to make something new. Prefer a one-time choice? Pick without saving a list.

A FAIR CHANCE FOR EVERY OPTION
Each option entry has an equal chance of being selected. The winner is chosen before the animation begins, and the wheel stops on that choice. Repeated results are possible, just as they are with a fair random draw.

KEEP THE LITTLE VICTORIES
Look back at your decision history with the result, time and selection mode. Share a winning choice as text through your device’s share sheet, or clear your history whenever you like.

MAKE IT FEEL LIKE YOU
Choose light mode, dark mode or your device’s appearance. Turn sound effects and vibration on or off. Sound and haptic feedback depend on device support and system settings.

OFFLINE AND SIMPLE
No account, no backend, no ads and no in-app purchases in this version. Your lists, results and preferences are stored on your device. Use the decision tools without an internet connection. Sharing through another app follows that app’s connectivity and privacy settings.

Dinner plans, game nights, movie picks, chores and friendly turn-taking: spend less time deciding and more time doing.

PickForMe is designed for everyday choices and entertainment. Use your judgment for important decisions.

Release notes

Meet PickForMe! Spin a colorful wheel or shuffle your choices, save reusable lists, revisit recent results, and share your pick. Includes offline storage, light and dark themes, and optional sound and vibration.

Suggested search language

Natural phrases already included in the copy: random picker, spin wheel, decision maker, shuffle list, offline choices. Google Play has no separate keyword field. Avoid repeating keywords or adding ranking claims.

Asset upload order

01: Home / everyday decisions
02: Create and reorder choices
03: Spin wheel
04: Shuffle list
05: Result and sharing
06: Reusable saved lists
07: Dark appearance and preferences

Temporary details to replace

Replace support@pickforme.example in every text and policy format. Confirm the public developer name against your Play Console profile. Publish the privacy-policy HTML at a public HTTPS address and insert that live URL. Recheck the listing if app features or SDKs change.
